

Rameez Khan

Senior Data Engineer

London, United Kingdom · rameez.rk94@gmail.com · linkedin/in/rxmeez · github/Rxmeez

Results-driven engineer focusing on **data infrastructure** and leveraging cutting-edge tools to drive **data-driven innovation**.

WORK EXPERIENCE

Senior Data Engineer · RVU

Aug 2023 – Present

- Leveraged **Argo Workflows** to orchestrate ETL processes, constructing **scalable data ingestion pipelines** that integrated diverse data sources into the data lake. Implemented ingestion from APIs, databases, and file systems, while utilising **Terraform** for infrastructure management.
- Accelerated product appearance on the website **from hours to seconds** by implementing a **TypeScript, RxJS, and Kubernetes**-based data transformation pipeline. Created a **domain-specific language** for the Bizops team, empowering them to manage and control data transformations efficiently.
- Developed a Flask-based tool for **automated monitoring and alerting** of **BigQuery** tables, improving team efficiency. Integrated Opsgenie for Slack alerts with anomaly and rule-based detection, deployed as containers on Kubernetes.
- Lead and mentor**: oversee team members' work, conduct 1-to-1s, and facilitated a Senior Data Analyst's **transition to Data Engineer** by developing their Python, SQL, and Cloud skills.

Data Engineer · RVU

Aug 2021 – Jul 2023

- Modularised data architecture by transforming RVU's monolithic **dbt** project into domain-specific dbt projects using **Great Expectations** and **Monte Carlo**, improving data contract reliability and monitoring efficiency.
- Implemented a new pricing model for the **GCP** estate, achieving a **50% annual reduction in operational expenses** while maintaining optimal performance for 95% of query jobs.
- Migrated orchestrators from **Dagster to Argo Workflows** using Kustomize for job rewriting, and **trained data and software engineers** on technology adoption and best practices.

Data Engineer · Mobkoi

2020 – 2021

- Cut costs 10x** by using **serverless** architecture on Google Cloud to move log-level data from Google Cloud Storage to BigQuery, with monitoring and alerting.
- Developed a **data warehouse in BigQuery**, collaborating with stakeholders to model data on requirements, and employed **dbt** for pipeline transformations, testing, and business-driven data models.
- Worked closely with the Lead Data Engineer to adopt best-practice approaches and integrate modern tools into the data platform.

Data Analyst · Mobkoi

2018 – 2019

- Optimised internal reporting, reducing report generation **from an hour to under 5 minutes** using **Python**, Jupyter Notebooks, and APIs, enabling deeper campaign analysis.
- Strengthened team capabilities by transitioning the team **from Excel to Python** and providing training in Pandas and SQL.

Industrial Engineer · Schneider Electric

2015 – 2017

- Enhanced productivity by developing a **real-time KPI monitoring system** and centralised database for the Leeds site.

EDUCATION & CERTIFICATIONS

Google Cloud Certified Professional Data Engineer 2022

Google Cloud Certified Professional Cloud Architect 2020

BEng (Hons) Chemical and Nuclear Engineering, University of Leeds, UK — 2.1 2012 – 2015
